Profile

I have got around 5–6 years of total work experience working different part-time jobs. I have been going to Davis Tech for around the past year to develop my skills in Solidworks. However, I have been using CAD software since high school. Usually I would use CAD to help 3D print or whatever I am building in my still-developing small workshop. I have made a couple of things for friends and family that have brought them immense joy, which also always makes me happy. I have a strong desire to learn and to get better at what I do. I always try to keep an open mind and a good attitude.

Work Experience

Team lead

Boondocks Food and Fun - Kaysville, UT

March 2023
– Present
